- 一、增加米產量：鼓勵農民增加種植，並提供必要之技術指導。
- 二、減少米消費：提倡節約，並限制非必要之米消費。
- 三、調節米流通：加強米糧之運輸與分配，確保市場供應充足。
- 四、穩定米價格：由政府出面收購與銷售，以平抑價格。

WELCOME TO OUR AMERICAN FRIENDS

The Korean public extend a hearty welcome to the group of prominent American journalists who are visiting this land of ours just now. Moreover their visit is considered more important than any other such occasions, because, we believe, as expert and wide-eyed observers, they will surely see things as they are, and even see through the things to the bare reality. And this will result in a better and sympathetic understanding between the two nations, American and Korean, about what is really going on in this land of suffering.

We do not ask them to see our land and people under any other light than the real. If there has been change and progress on any line, we want them to look at it and value it. If there has been retrogression and poverty, we want them to observe it, too, and ponder for the cause.

We regret that we have no freedom even to print here some statistics showing the real conditions of this country. But we are sure that it is not difficult to obtain such material if our honored visitors wanted to do so. And after all, we may safely say, that under the present regime, what Korea has accomplished and what is done for Korea, may not always be what Koreans have accomplished and is done for Koreans. Such distinction may or may not have been observed by travellers before.

Wishing our visitors a pleasant and fruitful journey, we assure them once more the sincerest welcome from all true Koreans in this land.
